

Residential HVAC: We want to hear from you!

In case you were not able to attend the Energy Efficiency Exchange or if you attended and were not able to stop by the Residential HVAC table, the Program has encouraging news and data to share.

HVAC is a large part of the 7th Power Plan Residential Savings potential. How we address this potential in designing programs is important, which is why we need to hear from BPA utilities about the future of Residential HVAC.

Please take a few minutes to take this short survey that will help us prioritize areas of improvement and plan long term program design: www.surveymonkey.com/r/PTCS2016.

Click [here](#) for PTCS program updates and data insights about Quality Assurance. Take a look to see how your PTCS projects stand against common barriers and what the Program is doing to drive better installations.

If you have any questions, please contact the Res HVAC Program at 800-941-3867 or <mailto:resHVAC@bpa.gov>.
